

IN THE SPECIFICATION:

Please replace the paragraph on page 3, lines 1-2 with
the following paragraph:

Brief Description of the Drawings

A2
The invention will be further described below with
reference to the accompanying drawings, in which

Please replace the paragraph beginning on page 4,
line 31, and ending on page 5, line 8, with the following
paragraph:

Experience shows that a certain amount of
solvent 2 accumulates in a lower space 19 in the
boiling chamber 8 and this solvent 2 is also brought
to boil and thereby emit solvent steam 71. Since
the flexible inner container 13 under unfortunate
circumstances might obstruct the path for the
solvent steam 7a and prevent it from flowing up into
the upper space 16 and out through the outlet 17, the
solvent steam 7a flowing upwards might lift the
flexible inner container 13, which is illustrated
with arrows D in fig. 3.

A3
IN THE CLAIMS:

Cancels claim 1 without prejudice.
